

The Wild Robot: Team Wilderness Task

Solve Problems Together in the Great Outdoors

Channel the spirit of Roz and her animal friends as you work together to overcome outdoor challenges! This team-based activity will test your problem-solving skills, creativity, and teamwork in a natural setting. Just as Roz had to adapt and work with the animals to survive on her island, you'll need to collaborate to complete these wilderness tasks.

What You'll Need

- A group of 3-6 people (family members or friends)
- Basic outdoor gear (appropriate clothing, water, snacks)
- A watch or timer
- A small backpack
- Pencil and notepad
- Optional: compass, magnifying glass, binoculars

Challenge Setup

1. Choose a safe outdoor location (park, woodland, beach, etc.)
2. Designate one person as the "Task Leader" to oversee the activities
3. Divide the rest into two teams if you have a larger group
4. The Challenge Master will present each task and judge completion

Wilderness Challenges

Complete as many as you can in 2 hours

1. **Shelter Building:** Create a small shelter using only natural materials that could fit all team members
2. **Water Transport:** Move water from point A to B using only natural materials (no cupping hands!)
3. **Nature's Palette:** Create a colour palette using only natural items (leaves, petals, etc.) - find at least 8 different colours
4. **Silent Communication:** Guide a blindfolded team member through a simple obstacle course using only non-verbal cues
5. **Camouflage Contest:** Hide a bright object in nature and see if other team can spot it in 2 minutes
6. **Natural Art:** Create a portrait of Roz using only items found in nature
7. **Sound Map:** Sit quietly for 5 minutes and create a map of all the sounds you hear, marking their direction and source
8. **Wilderness Invention:** Design and build a simple machine using natural materials to solve a problem (e.g., cross a small stream, reach a high branch)

Roz's Teamwork Log

After completing the challenges, reflect on your teamwork like Roz would:

- What was your team's greatest strength?
- What was the most difficult challenge and why?
- How did you adapt your approach for different tasks?
- What did you learn about working together in nature?

Ensure all activities are conducted safely and with respect for the environment. Don't damage living plants or disturb wildlife. Leave no trace - clean up any materials used for challenges.
